

Nampak Group Environmental Policy

Nampak is a diverse packaging company engaged in the production of metal, glass, paper and plastic packaging for food, beverage and a variety of other end-use markets. The company operates in Africa and Europe.

The management and staff are committed to ensuring that Nampak is an environmentally responsible company and believes that integrated actions taken within its operations to conserve natural resources and protect the environment make sound business sense.

These commitments are achieved by operating an effective Environmental Management System in order to:

- Comply with the requirements of ISO14001:20015;
- Identify and comply with relevant legislative requirements, internal standards, as well as the requirements of our stakeholders;
- Improve our environmental performance through establishing a framework for measurable and appropriate objectives and targets, regular monitoring and environmental audits;
- Promote environmental awareness, both internally and externally, through training and proactive communication with stakeholders;
- Prevent pollution and continually improve our performance through focussing on the following aspects of our operations:
 - Increasing our energy efficiency and reducing our GHG (greenhouse gas) emissions as a commitment to managing our impact on climate change,
 - Minimisation and recycling of waste generated by our operations as well as post-consumer waste,
 - Resource reduction through light weighting, and
 - Conservation of water resources;
- Provide the necessary financial and human resources at board and divisional level to give effect to this environmental policy;
- Communicate the policy to our staff, contractors and other stakeholders.

This policy will be reviewed on an annual basis to ensure that it remains appropriate to our business.
